

Bighorn 200/400/450 Windshield Assembly Instructions

Step 1 Unpack the windshield and lay it on a flat surface being careful not to scratch it. Keeping the brown paper in place will help protect the windshield. . Align each of the six clamps with the mounting holes in the windshield.

Step 2 Insert the rectangular clamp through the holes in the windshield from the front to the back.

Step 3 Open the Velcro straps.

Step 4 Position the windshield against the front bars. A second set of hands will help to hold it in place. Place a piece of cardboard on the vehicle hood to protect the surface until the windshield is installed and in place.

Step 5 wrap the Velcro strap around the bar, slide the strap under the metal bar, and then fold it back on itself to close the Velcro. Align the mirror brackets with the cutouts in the windshield and secure the mirrors in place. This will assure the proper positioning of the windshield and prevent it from moving.

It is easiest to start with the middle clamp on each side. Then, move the windshield up or down to get the proper position and proceed to the other clamps. Finally, pull the Velcro straps tight to secure the windshield in place. The brown paper can then be peeled off the windshield.
